KNOG HEAD QUARTERS

THE KNOG PARTY COIL

LOCK IN FREEDOM

Summer was made for cruising the streets on our beloved steeds and dancing up a storm until dawn. When you wake up in the morning with a kebab in your bed, at least you know your ride will still be there – next to your dignity – right where you left them. Say hello to Knog Party Coil.

The newest and longest lock of the Knog lock range, Knog Party Coil gives you epic long reaching strength, all coiled down into a bombastically bright, compact pocket lock.

Rocking a sweet, super-smooth 1.3m long silicone coiled body that loves to curl around bike frames, this deceptively tough little lock not only stands out in a crowd, but will run rings around any gate-crashing frat boy who throws as much as a sideway glance at your pride and joy.

Stretching out to 1.3m when fully extended, Knog Party Coil is constructed with a silicone overmoulded lock that's crimped to a PVC coated, woven steel cable. What makes Party Coil so unique is its woven fibre core that crushes before cutting, making bolt cutter attacks more frustrating for those smash 'n' grab party poopers.

Party Coil's 100mm coiled diameter and 300gram weight make it compact enough to fit in your pocket and the perfect wing man (or woman) for group cycling dates. With a zinc die-cast barrel for added security, it comes with 3 colour-coded overmoulded keys, has no leverage points, and won't scratch or mark your precious ride.

Knog Party Coil comes in 12 fun and rainbow-tastic colours including: black, titanium, indigo, cobalt, grape, rose, light red, gold, lime, turquoise, sky blue, and white.

Available in stores and online from April 2013. Expect them to retail at around \$24.95 USD.
