

# KNOG EXPOSE SMART SPECIFICATION SHEET JUNE 2015

## KNOG EXPOSE SMART

Video light for iPhone & Android

## OUTLINE

From sunset Vines to six a.m. Snapchats, the [expose] smart iPhone video light makes it easy to capture the night. Engineered to complement the iPhone's aesthetic and camera's beam angle, the [expose] smart light works seamlessly via a custom Bluetooth app giving users total control over brightness, flash mode and white balance in their photos and videos. More importantly the light outputs up to 130 lumens from nine hi-power LEDs, which is 6x more powerful than iPhone's built-in light making those midnight selfies a sinch. With an integrated USB rechargeable battery the light takes no power from the iPhone, ensuring you can film and photograph all through the night.

## SPECIFICATIONS
