

KNOG EXPOSE WRAP SPECIFICATION SHEET

KNOG EXPOSE WRAP

iPhone 6 case with video light

iPhone 5/5s case with video light

OUTLINE

Don't be left in the dark. The expose wrap is not just a case that protects your iPhone from any bumps in the night. It is also a hi-power video light so you can capture every moment from 'those' nights. Why do I need expose if my phone already has a light? The expose wrap is about 5x brighter than the in-built light. Videos and photos go from "trash it" to treasure.
